## Intro

I am a web developer. My focus is on the front-end, but I have some experience in the back-end as well in Node.js and Python. I have taught myself over the last couple of years with the aid of several online courses and occasional help of an experienced mentor.

## Tech Skills

- HTML5
- CSS3
- JavaScript
- jQuery
- Twitter Bootstrap
- slick
- Git
- Node.js
- Express.js
- Bash/Linux
- Python
- Firebase DB

## Work Experience

### Professional Experience - Web Developer, *February 2015 - Present*

#### DealerFire

Web Developer, *April 27th, 2015 - June 25th, 2015*

- Primary task involved using pre-made modules to create websites for car dealership/company clients.
- Languages/libraries utilized included HTML5, CSS3, JavaScript, jQuery, Bootstrap, etc.
- Other duties included communication with customers via the Salesforce system, e-mail, or phone on a consistent basis to keep up to date on changes made to the respective sites.

#### High Altitude Science

Web Developer, *February 2015 - March 2015*

- Designed and developed the front-end for the Weather Balloon Flight Simulator web app
- Front-end developed with HTML5, CSS3, JavaScript, jQuery, Bootstrap, slick, autoNumeric
- Built as a single-page app. This involved using slick to set up a slider that separated the three portions

of the simulator - one for the input parameters (launch date, burst altitude, etc.), one for the starting coordinates, and one for the results.

--

## Personal Projects

### Galaxy Tanks - (In development)

- Live demo: <http://kidicarus1337.github.io/galaxy-tanks/>
- Repo: <https://github.com/KidIcarus1337/galaxy-tanks>
- A single-page app (SPA) built on the HTML5 canvas that is a space-themed version of the classic tanks game
- Front-end developed with HTML5, CSS3, JavaScript, jQuery, Fabric.js
- Utilizes a custom-built physics engine that simulates gravity and collision detection among other things

### Snow App Project

- Live demo: <http://snow-app-project.herokuapp.com/>
- Repo: <https://github.com/KidIcarus1337/SnowProject>
- Unfinished prototype web app for a project which would've allowed people to hire others to shovel their driveway
- Developed front-end with HTML, CSS, JavaScript, jQuery, Bootstrap
- Wrote back-end with Node.js and Express.js, including registration and login functionality
- Integrated with Firebase DB

### Text-game Project

- Live demo: <http://kidicarus1337.github.io/Game-Project/public>
- Repo: <https://github.com/KidIcarus1337/Game-Project>
- Unfinished text-based game developed in my free time for experience
- Developed front-end with HTML, CSS, JavaScript, jQuery

--

## J.J. Keller - Data Entry, *Fall 2012 - February 2013*

- Helped migrate customer information to a new server setup

## Shopko - Customer Service, *Fall 2008 - Fall 2012*

- Primarily worked as a cashier and store front stocker
- Occasionally did some miscellaneous work

## Education

### Codecademy, 2013

- HTML & CSS
- JavaScript
- jQuery
- Web Projects

## **Udacity, 2012 - 2013**

- CS101 - Intro to Computer Science
- CS253 - Web Development

## **High School Graduate, 2006 - 2010**
